

## Sea Environmental Protection of Ningde Sea Areas

Article 1 Units and individuals that engage in aquaculture, navigation, exploration, development, tourism, scientific research and other activities in the waters of Sandu'ao, or engage in activities affecting the marine environment in the land areas adjacent to the waters of Sandu'ao, shall abide by the Regulations.

Article 2 The Ningde marine and fishery administrative department is responsible for the supervision and management of the marine environment in the waters of Sandu'ao, and is responsible for preventing and controlling the pollution and damage to the marine environment caused by marine engineering construction projects, marine dumping of waste, and other marine development and utilization activities such as marine aquaculture.

Article 3 The port administration department shall be responsible for the prevention and control of pollution of ports, wharves, loading and unloading stations and waterways in the Sandu'ao sea area.

Article 4 Ningde MSA is responsible for the supervision and management of the pollution of the marine environment by non-military ships in the waters of the Sandu'ao waters and non-fishing ships and non-military ships outside the port area, and is responsible for the investigation and handling of pollution accidents.

Article 5 All units and individuals have the obligation to protect the environment in the waters of Sandu'ao, and have the right to supervise and report the illegal and dereliction of duty of units and individuals that pollute and damage the environment of the waters of Sandu'ao, as well as the marine environment supervision and management personnel. Those who have legitimate rights and interests have the right to demand compensation according to law.

Article 6 The Sandu'ao Sea Area Government regularly organizes the administrative departments of environmental protection, fishery executive, maritime affairs, ports and other administrative departments to supervise and manage the marine environment.

Article 7 There is a marine environmental protection information management platform and a marine environment monitoring system in the waters of Sandu'ao, which provide information on the status and basic information of coastal pollution discharge, marine aquaculture,

and other activities affecting the marine environment, as well as the marine environment monitoring and surveillance formed by relevant functional departments according to their respective responsibilities. The information is integrated into the information management platform to realize the forecast, early warning and control of resource sharing and marine ecological environment conditions within the jurisdiction.

Article 8 The Sanduao Sea Area Government has formulated emergency plans for marine disasters such as red tides and storm surges, as well as emergency plans for major marine pollution accidents. The administrative departments of environmental protection, fisheries, ports, sanitation, water conservancy, market supervision, and maritime affairs shall, in accordance with their respective duties and contingency plans, take measures to effectively prevent and control marine disasters and pollution accidents.

Article 9 The Sanduao Sea Area Government has a routine maritime inspection and law enforcement inspection system, and organizes administrative departments in charge of fisheries, environmental protection, maritime affairs, ports, water conservancy, forestry, land, housing and construction and public security agencies to conduct joint law enforcement inspections at sea. Stop illegal acts and investigate and collect evidence, and have the right to take effective measures in accordance with the law when necessary to prevent the expansion of illegal situations, and report to relevant administrative departments for handling.

Article 10 Sandu'ao Sea Area Government accepts public reports and other information channels, investigates and punishes illegal acts in accordance with the law, and announces it to the public.

Article 11 The Sanduao Sea Area Government has set up prohibited breeding areas, restricted breeding areas and breeding areas. It is strictly prohibited to engage in marine aquaculture activities in areas where aquaculture is prohibited, as well as in military management areas, waterways and anchorages.

Article 12 It is forbidden to destroy coastal protection facilities, coastal shelterbelts, coastal green spaces, mangroves, coastal wetlands and natural coastal features.

Article 13 Vessels sailing or berthing in the waters of Sandu'ao shall not discharge pollutants such as [ship garbage](#), untreated domestic sewage, oily water, sewage containing toxic and harmful substances, waste gas and other pollutants into the waters of Sandu'ao; Pollutants shall be discharged into [qualified shore facilities](#) when needed. The carrier, cargo owner or agent of a ship carrying pollution-hazardous cargo entering or leaving the port in Sandu'ao waters shall submit an application to the competent maritime administrative department, and only after approval can enter or leave the port, transit or stop, or load and unload.

Article 14 Enterprises engaged in port operation, repairing, building and dismantling ships in the waters of Sandu'ao shall be equipped with pollutant collection, transshipment, and disposal facilities or hire corresponding services. Shall not discharge of oily water, chemical tank washing water, domestic sewage and dumping garbage to sea water.

Article 15 It is prohibited to directly discharge wastewater containing non-degradable organic matter and heavy metals into the waters of Sandu'ao. Untreated domestic sewage shall not be directly discharged into the waters of Sandu'ao. It is strictly forbidden to dump, dispose of garbage and other wastes in the coastal waters and beaches without authorization.

Article 16 Violation of the relevant provisions of these regulations, the relevant laws, regulations and rules have provisions for punishment, and the provisions shall prevail.

Article 17 Anyone who violates these Measures and commits any of the following acts shall be punished by the government according to law:

- (1) Carrying out production and construction activities within the scope of the marine ecological protection area in Sandu'ao waters;
- (2) Domestic waste and domestic sewage are directly discharged into the sea;
- (3) Ships directly discharge the pollutants that are legally prohibited to be discharged into the sea, such as ship garbage, untreated domestic sewage, oily sewage, sewage containing toxic and harmful substances, waste gas, etc.;
- (4) Port units, ship repairing and dismantling enterprises that discharge oily sewage, chemical tank washing water, domestic sewage and dumping garbage into the sea area;
- (5) Illegally set up sewage outfalls into the sea;

- (6) Illegal discharge of wastewater containing non-degradable organic matter and heavy metals into the sea;
- (7) Dumping, disposing of garbage and other wastes in coastal waters and beaches;
- (8) Illegal reclamation and sand mining;
- (9) Other acts in violation of this regulations.

Article 18 Units and individuals that cause environmental pollution in the sea areas in violation of these regulations shall eliminate the damage and compensate the units or individuals for the direct damage; those who seriously pollute the marine environment or damage the marine ecology and constitute a crime shall be investigated for criminal responsibility according to law.

Article 20 Sandu'ao waters and land areas adjacent to Sandu'ao waters referred to in these regulations

ZHANG WAN	SANDUAO	BAIMA	NINGDE
-----------	---------	-------	--------

Article 21 The marine environmental protection work of other adjacent sea areas in Ningde shall be implemented with reference to the regulations.

Article 22 These regulations came into force on December 1, 2018.
